Build Practical Risk Assessment Skills at RASS 2026

Apply Today!

Risk Assessment Summer School 2026

November 1-6, 2026 | Kuala Lumpur, Malaysia

The IUTOX Risk Assessment Summer School (RASS) 2026 will bring together 30–40 participants in Kuala Lumpur, Malaysia, for a week-long course focused on the principles of risk assessment and toxicological testing.

Participants will have opportunities to:

-  Strengthen their understanding of risk assessment and toxicological testing
-  Gain practical, hands-on experience applying toxicology concepts
-  Learn from expert speakers from Asia, Europe, North America, and beyond
-  Collaborate with professionals from a range of scientific and health disciplines
-  Contribute to group discussions and present a report from their working group
-  Explore topics including toxicology, vaccine development, biosafety, and more

Postgraduate students, postdoctoral researchers, veterinarians, pharmacists, doctors, biologists, and biomedical scientists are encouraged to apply. All sessions and course

materials will be presented in English, and a written examination will be held at the end of the course.

Apply Today!

This is a 5-day course with lectures and working group sessions. A written exam will be held at the end of the course. All sessions and materials are presented in English.
